## **Baker Donelson Achieves ISO 27001 Certification for Information Security Management**

**January 20, 2022**

**Baker Donelson has achieved ISO 27001 certification, an internationally recognized certification for information security management.**

Earning the ISO 27001 certification shows that Baker Donelson is in compliance with rigorous international standards regarding utilization of best practices, ongoing governance, and management of information systems to ensure the security of client and firm data. Baker Donelson was awarded this certification by BSI, a leading provider of business improvement solutions.

"As a law firm, it is critically important that we safeguard the security of our clients' information. Protecting the interests of our clients has always been paramount for us, and earning the ISO 27001 certification demonstrates that Baker Donelson has the necessary controls in place to ensure that all client data is secure and protected," said the Firm's Chief Information Officer [Lance N. Rea](#).

Published by the International Organization for Standardization (ISO), ISO 27001 is an information security management standard that specifies a management system that is intended to bring information security under management control.
